Windhoek, Namibia

## About Me

Junior software developer and IT intern who has experience in creating REST APIs, winforms applications using .NET/C#, Python automation scripts and SQL Server databases. I am also very good and like the back-end development and database design, and my passion is in problem solving and developing efficient and scalable solutions. At ease throughout the stack-schema design and validation, deployment and scripting. Devoted to creating clean and testable code and automation of repetitive tasks to be more efficient.

## Skills

- Social
- Hard working
- Driven
- Negotiation
- Critical Thinking
- Leadership
